

Mac M1 Update Beta Testing – May 2021

Please check out the items listed below, but most importantly, please continue to use EQ8 like you normally would. We need to fully test all features of EQ8, not just the ones listed below. Thank you!

If you would like some direction you can use this list as suggestions for things to test. You do not need to return this form to us. **Please tell us if anything isn't working as you expect or if everything is working normally for you.** Both types of feedback are helpful.

Check for Noticeable Lag/Delays in these Operations

- Opening Project Helper window via File > Open Project.
- Opening Project Helper via the Open button.
- Opening Project Helper via the Open option on the Home screen.
- Selecting projects in the Project Helper window.
- Open a project by choosing a project in the Existing Projects list in the Project Helper.
- Open a project by clicking the Open button at the bottom of the project Helper that pulls up the Open dialog.
- Open a project in the Most Recently Used Projects list in the Project Helper.
- Save a project by clicking File > New Project and giving the project a name in the Project Helper.
- Adding to Sketchbook (all items).
- Adding a new Auto Border to the quilt.
- Opening and using the Libraries if there are add-ons linked to that library.
- Editing blocks directly from the Block Library to the Block Worktable.
- Adding Serendipity blocks to the Sketchbook – lag was happening when the Serendipity dialog closes.

Check that these Actions Work as Expected Without Errors

- Check for updates has been removed from the File menu.
- Open Photo Library, select a photo, and choose Edit to Image Worktable.
- Restore defaults.
- Creating and saving a Favorites Library of blocks, fabrics, etc.
